PROFESSIONAL SUMMARY

Solutions Engineer with hands-on experience in enterprise SaaS pre-sales, technical product demonstrations, and proof-of-concept development. Skilled at translating complex business requirements into solution architectures, building BI dashboards, and driving API integrations across cloud platforms. Proven track record of delivering 200+ BI walkthroughs, 40+ enterprise demos, and 10+ PoCs. Adept at bridging technical and business teams to accelerate deal cycles and drive product adoption.

KEY EXPERIENCE

Solutions Engineer (Pre-Sales) — LogiNext Solutions

- Delivered 40+ product demos to enterprise buyers evaluating cloud-based logistics and workflow orchestration solutions
- Conducted technical discovery to translate customer requirements into tailored solution architectures
- Supported 10+ proof-of-concept engagements with product and engineering teams to validate technical fit
- Communicated ROI drivers and value propositions to business stakeholders to accelerate deal closure

Solutions Consultant (BI Pre-Sales) — Zoho Analytics

- Conducted 200+ technical product walkthroughs across enterprise BI use cases in finance, HR, and operations
- Performed requirements discovery and translated 100+ customer needs into dashboards and KPIs
- Built 50+ solution artifacts demonstrating cloud data integration and analytical capabilities
- Collaborated with sales and engineering to identify and resolve adoption blockers

Business Analyst Intern

- Analyzed payroll, scheduling, and operations data to improve accuracy and system efficiency
- Built reporting assets to support decision-making across payroll operations workflows

Student Assistant — Analytics & Operations — DePaul University

- Built dashboards using Oracle Cloud ERP data to improve visibility into accounts payable workflows
- Supported invoice validation, approvals, and ERP workflow operations

FEATURED PROJECTS

BreezeML

Open-source Python library that simplifies ML workflows with clean API abstractions for common algorithms.

[Python](#) [scikit-learn](#) [Pandas](#) [Open Source](#)

VibeLink Analytics

ML-driven behavioral analysis for matchmaking platforms — modeled engagement, churn, and match success.

↳ [Reduced churn by 12% via behavioral targeting](#)

[Python](#) [SQL](#) [ML Models](#)

Static BI

Prompt-driven dashboard generator that converts business questions into instant visual insights.

[Python](#) [BI](#) [Data Visualization](#)

SaaS Demo Storytelling

Master narrative framework for complex B2B software demos, focusing on value selling over feature dumping.

↳ [Increased demo-to-close rate by 15%](#)

Pre-Sales Storytelling B2B SaaS

Carbon-Aware Scheduling (Research)

Simulation framework evaluating carbon-aware routing policies for multi-region AI inference with SLO/latency trade-offs.

↳ 33,600-request simulation across 5 cloud regions & 3 AI workloads

Python Cloud AI Inference Sustainability

TECHNICAL SKILLS

Pre-Sales & Solutions

Product Demos, PoC Development, Technical Discovery, Solution Architecture, Value Selling, RFP Responses

Cloud & Platforms

AWS, Azure, Oracle Cloud ERP, SaaS Ecosystems, API Integrations, REST APIs, Git, GitHub

Data & Analytics

SQL, Python, Pandas, BI Dashboards, KPI Design, Data Modeling, Zoho Analytics, Excel / Google Sheets

Tools & Automation

scikit-learn, LLM Tooling, Workflow Automation, HTML/CSS/JS, Postman, Jira, Confluence

EDUCATION

M.S. Business Analytics — DePaul University, Chicago | GPA: 3.93

Predictive Analytics · Data Mining · Financial Analytics · SQL · Machine Learning · Cloud Systems

B.B.A. — Business Strategy & Operations

AWARDS & HONORS

- Dean's Scholarship (\$7,500) — DePaul University
- Student Ambassador Scholarship (\$4,500) — DePaul University
- Best Presenter Award — Zoho Annual Review
